Dear ABC,

THANKS FOR CHOOSING <http://www.indastro.com>

We have been providing astrology consultation and advice on true vedic principles on the internet since 2000 and serviced over a million customers with our free and premium services. We have prepared the stock market analysis for you.

DO YOU HAVE SPECULATIVE "LUCK"?

The speculation luck is determined by a combination of factors. **There are three important parameters** which determine whether you can make money in stock market or other speculative type of investments.

The first parameter is based on your natal chart in the form of The lords of 2nd, 5th, 9th and 11 th house who contribute to wealth. The lords of 6/8/12 (called "Trika Houses")contribute to ruin and misery.

In order to determine the "luck" aspect in day trading and stock market generally, (including futures and options trading), we need to look at the lords of 2/5/9/11 houses and see if they are associated with any trika houses or trika lords in any form. If such association is there, there is unlikely to be speculative luck and even if in the short run, some money is made, in the long run, overall the losses are likely to outweigh the profits made.

In your chart, the 5th lord is in 6th (which is a trika house) but the other lords are somewhat better placed. But since 5th house specifically denotes the speculative luck, it is advisable for you not to indulge in any speculative transactions in which you are more likely to loose money.

The second is , we need to look at 5th house (purva punya sthana) and its lord. Purva punya basically means that in the earlier births, lot of efforts have been made but the fruits thereof will be reaped in this birth. If the purva punya is good, there is a good possibility of "windfall" gains (although strictly speaking these are only rewards for efforts made in the earlier birth but the fruits of which have not been given earlier but is given in this birth). In your chart, the 5th lord is posited in 6th house which is a "trika" house. Nevertheless, since the 6th lord is also posited in 6th house you have a different type of yoga called "Vipareeta Raja Yoga", which can give you a very sudden upliftment, beyond your imagination during the dasa or bukthi of Mars. But this will happen in the most unexpected way and all of a sudden.

The third is your wealth potential, investment potential and speculative potential in this birth. These need to be calculated which we have done for you and the position is as under:

Wealth potential	82.87%
Investment potential	03.38%
Speculative potential	33.90%

The number 100 represents full potential in these cases. The closer these are to 100, you will have that much potential (you can take it as probability of success in these matters).

In your case

While the wealth potential is good indicating that you can be really wealthy by earning in normal course, the investment potential and speculative potential being very less, these are indicative that you cannot make sustainable money in the long run in speculation and stock markets etc.

The contribution to your investment potential by each planet in your chart is given below.

Jupiter	06.75
Sun	12.50
Mars	50.00
Venus	75.00
Mercury	100.00
Saturn	75.00
Moon	12.75

We also give below the ashtavarga distribution in different signs in your chart.

Based on the above ashtakavarga derived from your chart, it may be observed that Gemini, Cancer, Scorpio, Sagitarius and Aquarius are having more than 30 ashtakavarga points. When these signs arise, (i.e. when these signs become ascendant or lagna everyday, at that time of (approximately 2 hrs for each lagna) your luck factor will be optimum for the day.

You can time your efforts accordingly for everything where you want a relatively high degree of success. Please remember that we have not recommended any specific stocks but only the sectors indicated by planets in your chart which are contributing to your speculative/investment potential. Even at the cost of repetition, we restate that you have to exercise proper discretion and do considerable research in selecting specific scrips in these sectors.

The other general guidelines which help in conserving capital are: Do divide your capital into several parts and never risk more than what you can afford to lose. Always use stoploss and protect the trade. Never overtrade. Never let profit run into loss (i.e. keep booking profit periodically). Do not buck the trend. When in doubt get out and don't get in when in doubt. Trade/invest only in active stocks. Trade at the market levels. Follow up with stop loss to protect your capital. Accumulate the surplus separately. Never get in or get out due to impatience. Never cancel a stop loss. Avoid getting in and out very frequently. Never buy because the price is low. Do not change your position unless validated by research. Finally, nothing can substitute for Research of the stock where you are putting in money.

Best Regards,

Pt. Punarvasu
